

Learning Activity – Topic 5 – Job Analysis

Katrina Higham
S2921611

Analysing a job

I look for whether the job suits my experience and if it is a position that is going to challenge me and increase my knowledge.

3 main tasks and responsibilities of my current job are:

1. Undertake initiatives that will engage customers, develop new business, sales and drive innovation to meet and exceed targets;
2. Develop, implement and maintain customer growth and retention strategy
3. Identify, champion and manage new projects to create strong partnerships

Dream Job

My dream job is where I am inspiring, educating and motivating people to be the best that they can be. I absolutely love working in the education and training sector and if it can be in hospitality and inspire apprentices and chefs to be the best versions of themselves.

The key aspects of the dream job would be to travel and innovate.
